Essexville Street Sweeping / Catch Basin Cleaning Procedures

1. The city sweeps the streets of the entire town at least 2 times a year. The first sweeping begins in April and culminates with the fall leaf clean up. The main streets of the city (the 4 border streets) are swept on a monthly basis throughout the April to fall leaf season.
2. The city utilizes Waste Management Corporation to dispose of the street sweepings and catch basin cleanings. Both items are profiled by Waste Management (Approval # 112699MI) and hauled by 40 cy dumpsters which are located at the Public Works Facility at 1500 Pine Street, Essexville, MI. A copy of the Profile is available at Public Works 989-893-7192. The current Profile expires on 03/07/2019.
3. The city cleans it's 290 catch basins on a 3 year cycle with the use of its Vactor truck. The material removed from the catch basins is placed in Waste Management dumpsters and taken by them to an approved location.
